PROFESSIONAL SUMMARY

Computer Engineering graduate (B.E., Mumbai University, 2026) and Data Analyst intern with hands-on experience in predictive modeling, SQL and BI dashboards. Built an XGBoost price-forecasting and investment-scoring model (99.2% accuracy, 93% RMSE reduction vs. a fixed baseline) and caught data errors that distorted stock returns by ~70 percentage points. Seeking to apply machine learning and analytics to pricing and commercial performance.

TECHNICAL SKILLS

Programming & Databases: Python, SQL (MySQL), MongoDB, JavaScript
Data Science & ML: Pandas, NumPy, Scikit-learn, XGBoost, Predictive Modeling, Feature Engineering, Model Evaluation, Statistical Analysis & Hypothesis Testing
BI & Visualization: Power BI, Tableau, Excel, Matplotlib
Tools & Platforms: MLflow, Streamlit, GitHub, VS Code

EXPERIENCE

Data Analyst Intern — Labmentix
Delivered four end-to-end data projects, from data cleaning and modeling to dashboards, apps and insight reports (below).

PROJECTS

Real Estate Investment Advisor — Investment Classifier & 5-Year Price Forecaster
Labmentix Internship Project | Python, XGBoost, MLflow, Streamlit

- Cleaned 35,359 Indian property listings in Pandas: repaired 16,647 rows (47%) with the floor above the building's top floor, recomputed price per sq ft that was rounded to zero in 331 rows, and standardised 325 amenity spellings into binary flags.
- Engineered rule-based targets (growth-model 5-year price, 9-point investment scorecard) and compared 6 models in MLflow; XGBoost reproduced the labels at 99.2% accuracy (ROC-AUC 0.9996) and cut 5-year price RMSE by 93% vs. a fixed-8% baseline.
- Answered 20 EDA questions with significance tests, showing the data behaves as simulated (price unrelated to size, city or amenities; $R^2 \approx 0$ predicting today's price); shipped a 6-page Streamlit advisor with confidence scores, feature importance and filters.

Stock Market Analysis in SQL — Moving-Average Buy/Sell Signals on 6 NSE Stocks
Labmentix Internship Project | MySQL, SQL, Python, Streamlit

- Validated 889 trading days of price data per stock (2015–2018) in MySQL, auditing NULLs across every column and keeping them as NULL instead of inventing values.
- Built 20-day and 50-day moving averages and Buy/Sell/Hold crossover signals using window functions (AVG OVER, LAG, PARTITION BY), CTEs and UNION ALL across all six stocks (56 Buys, 57 Sells).
- Traced ~50% one-day price drops in TCS and Infosys to unadjusted 1:1 bonus issues and corrected the data, changing returns from -23.8% to +52.4% (TCS) and -30.9% to +38.2% (Infosys); delivered an insights report and a Streamlit live-SQL app.

Mutual Fund Overview & Insights — Data-Driven Fund Scoring & Ranking
Labmentix Internship Project | Python, Scikit-learn, Power BI

- Cleaned a real-world dataset of 814 Indian mutual fund schemes in Pandas/NumPy, resolving inconsistent data types, missing values and duplicate records.
- Engineered a weighted value-scoring model with Scikit-learn's MinMaxScaler, combining 3-Year Return, Expense Ratio, Fund Age and 1-Year Return to rank 793 funds and extract the Top 30.
- Designed a 2-page, 12-visualization Power BI dashboard on AMC, category and risk-return insights, with an executive summary to support investor decisions.

Instagram Performance Analytics — Sugar Cosmetics Engagement Dashboard
Labmentix Internship Project | Python, Pandas, Tableau, Streamlit

- Cleaned and validated 50,000 Instagram posts (Apr 2024–Apr 2025), checking missing values, duplicates, zero values and Reach/Impressions logic, and engineered engagement-rate, month, weekday and hashtag-level fields.
- Built 8 analysis sheets and an interactive Tableau Public dashboard (KPIs, posting trend, top posts, post type, weekday, engagement funnel, hashtags), plus a Streamlit version.
- Found engagement rate (18.54%) consistent across formats, weekdays, hashtags and campaigns (within ~0.2 percentage points), with likes at ~81% of interactions; recommended A/B tests and share/save prompts in an insights report and stakeholder presentation.

EDUCATION

B.E., Computer Engineering — New Horizon Institute of Technology & Management, Mumbai University | 2022 – 2026
H.S.C., Science — Rosary Convent Jr. College, Maharashtra Board | 2020 – 2022
S.S.C. — Abdullah Patel High School, Maharashtra Board | 2020

LANGUAGES

English, Hindi, Urdu
