ANAS HAIDERY

Software Engineer | AI/ML | Data Analyst

Mumbra, Thane, Maharashtra | +91 91675 53860 | haideryanas@gmail.com
LinkedIn: linkedin.com/in/anas-haidery-76b43a376 | GitHub: github.com/haideryanas-hash

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience building full-stack applications, applied machine learning tools, and data-driven solutions. Skilled in Python, SQL, Power BI, and Excel for data cleaning, analysis, and visualization, alongside experience in AI/ML and web development, with a track record of shipping end-to-end projects, from e-commerce platforms to deep-learning-based media tools. Seeking a Software Engineer, Data Analyst, or Full-Stack Developer role/internship to deliver production-quality, user-focused, data-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript
Data Analysis & BI: Power BI, Excel, SQL (Window Functions, CTEs), Pandas, NumPy, Matplotlib, Scikit-learn
Web Development: HTML5, CSS3
Databases: MySQL, MongoDB
AI / ML & Data: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision
Tools & Platforms: Git, GitHub, VS Code, Cloudinary, Streamlit
Core Strengths: Problem-Solving, Teamwork, Leadership, Communication

PROJECTS

HireSphere — AI-Based Intelligent Recruitment Platform

- Built a unified recruitment platform connecting applicants and recruiters, streamlining job posting, application tracking, and candidate screening.
- Implemented secure file uploads for resumes and profile pictures using Cloudinary, improving upload reliability and reducing server storage overhead.
- Designed the platform architecture end-to-end (frontend, backend, and database), with structured data storage and retrieval powered by MongoDB.

Mutual Fund Overview & Insights — Data-Driven Fund Scoring & Ranking

Data Analyst Internship Project, Labmentix | Python, Scikit-learn, Power BI

- Cleaned and analyzed a real-world dataset of 814 Indian mutual fund schemes using Python (Pandas, NumPy), resolving inconsistent data types, missing values, and duplicate records.
- Engineered a weighted Fund Scoring model using Scikit-learn's MinMaxScaler to normalize and combine 3-Year Return, Expense Ratio, Fund Age, and 1-Year Return, ranking 793 funds and extracting the Top 30 highest-scoring funds.
- Designed a 2-page, 12-visualization Power BI dashboard surfacing AMC, category, and risk-return insights, paired with a documented executive summary to support investor decision-making.

Stock Market Analysis in SQL — Moving-Average Buy/Sell Signals on 6 NSE Stocks

Data Analyst Internship Project, Labmentix | MySQL, SQL, Python, Streamlit | GitHub

- Validated 889 trading days of price data per stock (2015–2018) in MySQL, auditing NULLs across every column and keeping them as NULL instead of inventing values.
- Built 20-day and 50-day moving averages and Buy/Sell/Hold crossover signals using window functions (AVG OVER, LAG, PARTITION BY), CTEs, and UNION ALL, first for Bajaj Auto and then for all six stocks (56 Buys, 57 Sells).
- Traced ~50% one-day price drops in TCS and Infosys to unadjusted 1:1 bonus issues and corrected the data, changing returns from -23.8% to +52.4% (TCS) and -30.9% to +38.2% (Infosys); delivered an insights report and a Streamlit live-SQL app.

Result Management System — Database-Driven Application

- Built a system to manage and publish student results, replacing a manual, spreadsheet-based process.
- Reduced manual processing errors and turnaround time by 40% through automated data validation and streamlined workflows.
- Used Excel for data cleaning and Power BI to build result-trend dashboards, presenting actionable insights to faculty stakeholders.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering — New Horizon Institute of Technology & Management, Mumbai University *2022 – 2026 | Completed*
Higher Secondary Certificate (H.S.C.), Science — Rosary Convent Jr. College, Maharashtra Board *2020 – 2022*
Secondary School Certificate (S.S.C.) — Abdullah Patel High School, Maharashtra Board *Completed 2020*

EXPERIENCE & ACTIVITIES

- Participated in coding hackathons and AI/ML workshops at NHTIM, collaborating in small teams under time constraints.
- Collaborated with peers on open-source and academic projects, contributing code and documentation on GitHub.
- Active member of campus tech communities, exploring emerging areas including AI, data analytics, and blockchain.

LANGUAGES

English, Hindi, Urdu
